Recommendation for Erika Moore

I am excited to give my highest recommendation to Erika Moore. Erika has been my student in Honors Physics 1 (sophomore year) and Honors Physics 2 (senior year). Based on her performance in my classroom, I am confident that she is an excellent candidate for special recognition and scholarship awards.

From day one of class, Erika has shown a willingness to work hard. She gives her best effort when taking notes, performing lab work, and staying involved in class. Erika's work is always high in quality- she always turns in assignments that are complete and well thought out. While Erika's work ethic is surely a contributing factor to her academic achievement, it is clear that she also possesses a great deal of natural ability. Physics presents many concepts that are challenging and abstract. Erika has been able to maintain excellent achievement even on the most difficult tasks. She consistently demonstrates her ability to think and solve problems like a scientist.

You will also find that Erika has a wonderful personality and great character. She is dependable and mature, taking full responsibility for her performance and actions. Erika never needs constant reminders of work that is due. She completes assignments in a timely fashion and never complains or makes excuses. She makes a great partner or group member, and the work that results is always excellent. Erika definitely emerges as a leader when working in a team environment.

Erika's achievement extends beyond the classroom. She is an athlete performing on the volleyball court, and she is a strong participant in the FBLA club (Future Business Leaders of America). Erika is the kind of person that can be given important jobs, and you know that she will get the job done.

Erika's ability, character, work ethic, and attitude all combine to produce an amazing young woman. That is exactly why Erika will continue to excel at the post-secondary level, just as she has excelled in my classroom. I can promise you exactly what Erika has displayed every class in the last two years: she will show up everyday, she will work hard, and she will make the best out of every situation. Erika Moore is a wonderful student and person, and I enthusiastically recommend her for scholarship awards.
