To Whom It May Concern:

I am writing to you on behalf of Brooke Hathhorn. I give Brooke Hathhorn my highest recommendation for admission into your college or university.

Brooke demonstrated the ability to thrive in a rigorous, student-centered learning environment as she successfully completed Advanced Placement Physics 1 last school year. In order to complete the work required in the course, students must be able to maturely manage their time, collaborate well with their peers and adults, as well as persevere through stressful situations. Frequently, Brooke asked thoughtful questions to discover the key details or variables central to studying a physics concept. Consistently, she was able to design, carryout, and communicate lab procedures to prove established scientific laws or showcase novel applications of the scientific laws. In addition, she was able to dissect and identify the significant information given in the descriptions of complex, problem-solving scenarios. Moreover, Brooke was able to construct and communicate mathematically and scientifically sound solutions to complex, problem-solving scenarios by connecting relevant concepts and equations in unique and specific ways. Consistently, she was able to define physics vocabulary and concepts using precise and demonstratable wording. Specifically, what made Brooke stand out was her genuine kindness and true love of learning. Brooke is a model student and wonderful person. Her automatic interaction with all people is loving kindness. She always greets others with a welcoming smile. All people, young and old, truly enjoy talking with and working with Brooke. What is truly remarkable is that this kind person is also impressively intelligent. There was no challenge too difficult for Brooke to successfully complete. Her work was exemplary in every way. And, she always went out of her way to help anyone she noticed was struggling. Brooke is truly a thoughtful person, both socially and intellectually.

I am confident Brooke Hathhorn is ready for the social and academic challenges she will face at the collegiate level of education. Therefore, I give Brooke Hathhorn my highest recommendation for admission into your college or university

Sincerely,

Mrs. Jamie R. Pugliese  
AP Physics 1 and 2 teacher
