

Hampton Township School District
High School

Dr. Marguerite Imbarlina, Principal
Mr. Joshua Cable, Assistant Principal
Mr. Michael Amick, Assistant Principal

September 15, 2018

Dear Selection Committee:

My name is Heather Dietz and I have been the AP Biology teacher at Hampton High School for the past 16 years. I am writing this letter to enthusiastically recommend Amanda Moser for admission to your college.

I first met Amanda when she was a student in my Biology 2 Honors class her sophomore year. Amanda also continued with the biology track and took Advanced Placement Biology her junior year. In both classes, Amanda quickly stood out as one of the top students in the class. Amanda was an active participator and always asked questions that help tie concepts together. In both classes, Amanda was exposed to a broad range of biological principles that built upon the concepts learned previously in freshman biology. Amanda had an innate ability to take in the material, grasp the concepts, and convey understanding through written expression. Her curiosity and enthusiasm for the subject were apparent in the questions that she asked and in our discussions of future career options. Her final grade in AP Biology was a 97%A, and she earned a 4 on the National AP Biology exam.

In group settings, Amanda worked well within her lab group and was a natural leader that helped her peers stay on track during the many labs and activities we completed. Amanda's positive attitude and commitment to succeed have helped her be successful in all biology classes in I have taught her. Amanda has a genuine love for biology and I foresee her using her talents to make a noteworthy contribution to the scientific community in years to come. I definitely miss her presence in my classroom this year. She is a student that I will not forget, for students like her are few and far between.

In closing, I strongly recommend that Amanda Moser be accepted into your college. Any teacher that had Amanda in class can attest to her pleasant nature, willingness to learn, and determination to achieve. Amanda's enthusiasm to further her education in a field that she loves can only mean great things to come.

Please contact me should you have any questions.

Sincerely,

Heather L. Dietz
AP Biology Teacher
