MARY BETH LEEMAN  
Principal

DAVID WOODS  
Assistant Principal

To the Admissions Office and Scholarship Boards,

It is with great pleasure and without hesitation that I am writing this letter of recommendation for Cameron Pagley. In his freshman year, Cameron was quiet with a strong work ethic and an abundance of potential. As a junior, I taught Cameron again in a biochemistry course which blended concepts from organic chemistry and cellular molecular biology. Through my experience with Cameron in class, I have had the pleasure of seeing him learn to learn, strengthen his confidence in communication, and develop into a well-rounded and well-respected student.

Beyond Cameron's work in the classroom, he is also driven to have an impact on his school and community. Since Cameron's sophomore year, he has been a very reliable leader within the Science Club and is currently our Science Club president. He is always someone I can depend on when I need help with club activities. Cameron also participates in impactful clubs such as the Friends of Rachel Club and the Unified Youth Club. Both of these clubs focus on supporting the students within our school socially and emotionally. The members of these clubs are frequently utilized as points of contact for students who are new to the district, or are struggling with personal issues such as stress and depression. Cameron is also actively involved in the Science Club, Health Careers Club, Spanish Club, and STEM Club. Through these clubs and through the district's Gate program, Cameron participates in a wide variety of service initiatives, field trips, and academic competitions. For all four years of his high school career, Cameron has been an officer for the Student Council and has helped organize school events and initiatives. His leadership in a wide variety of school organizations has made Cameron a vital component to our school community.

With all of his involvement in the school culture, it is impressive that Cameron has also remained dedicated to his studies earning High Honor Roll 9-11th grade. Undoubtedly, he will earn it for his 12th grade year as well. His contributions to the school and community have earned him membership in the National Honor Society, Academic Excellence League, and most recently, awarded him the Bausch & Lomb Honorary Science Award.

In looking ahead to Cameron's future, I know without a doubt that he will have a positive impact on every community he joins. His unique combination of intelligence, drive, and kind spirit will take him very far as he pursues a degree in Chemistry or Biochemistry. In my opinion, it is truly rare to find a student with his potential. He will undoubtedly succeed at whatever he passionately puts his mind to. Please do not hesitate to contact me if you have any further questions.

Sincerely,

A handwritten signature in cursive script that reads "Rebecca Cottingham". The signature is written in black ink and is positioned above the printed name.
